4th largest bank in the Midwest US.

The 4th largest bank in the Midwest US, with 46 full-service bank branches across USA and $2.9 billion in total assets, offers comprehensive variety of financial services and products. The Bank continually upgrade its technology infrastructure by investing in the latest tools and run their business process for correspondent lending using Cloud based proprietary LOB System.
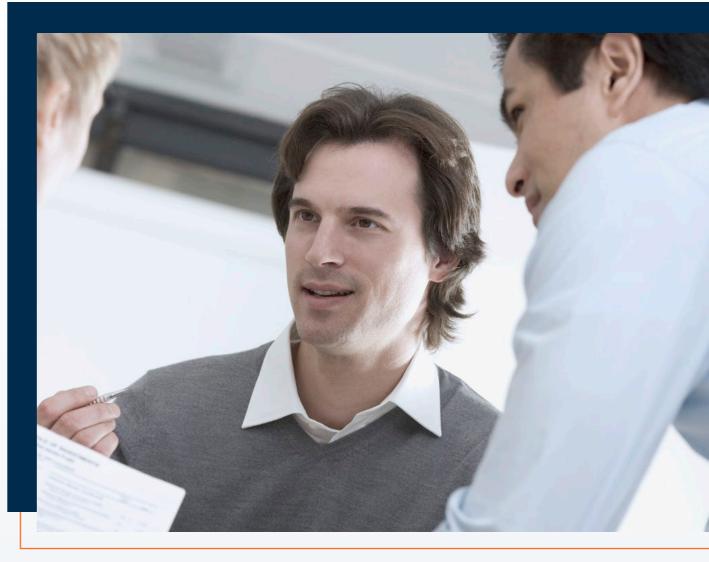

CHALLENGES

The challenge in hand was to ensure application's availability and reliability while meeting all financial services related compliances and security standard as well as meet technical requirements to deliver best performance for customers across US east coast and west coast.
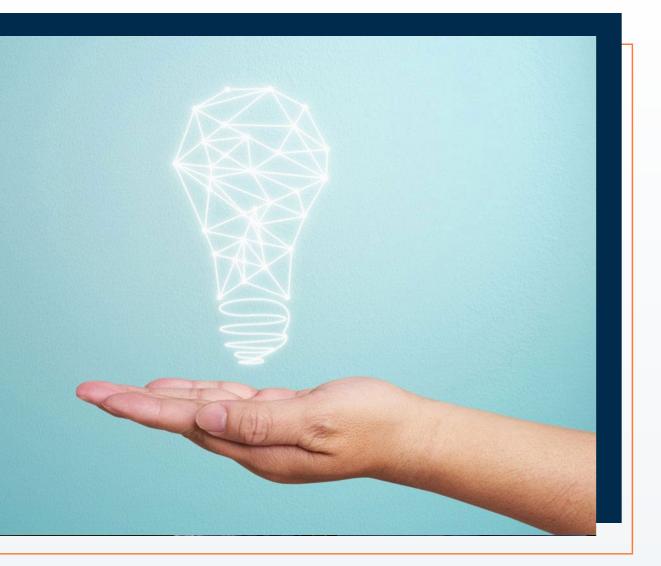

IDEAL SOLUTION

With Bitscape's RegTech expertise, Bitscape team moved this mission critical application for the bank to Azure with High Availability and Different Regions for Production Environment as well as non-production/test environment separately.

DESIRED OUTCOMES

The result was a dependable app running from scalable, load balanced, elastic architecture as well as improved performance, that allowed them to further lease or offer on subscription to other banks in West Coast and resulted not only achieving primary goal but opened additional revenue stream for the bank.

BITSCAPE

Bitscape Cloud Readiness Assessment

The Modernization Solution from Bitscape provides a comprehensive approach to migrate infrastructure workloads to an enterprise ready cloud.

1 Assessment Phase

Bitscape will provide you with a series of architectural reform scenarios to help inform our recommendation and your decision on how to most cost-effectively and efficient move to Azure.

2 Plan Phase

Bitscape will form together all the initial assessment and recommendations into an architectural design of the existing infrastructure and will prepare an executable plan.

3 Deliverables

Comprehensive Infrastructure Design and recommendations. Strategic and well-defined azure infrastructure architecture will help understand what modernization will look like.

Bitscape Migration Service & Microsoft Azure

Azure is an open and flexible cloud platform from Microsoft that enables businesses to quickly build, deploy and manage applications across a global network of Microsoft-managed datacenters supported by partners like Bitscape who not only help you size it, but optimize, deploy and support it as required.

Bitscape Cloud Consulting Service

Bitscape delivers consultation to develop digital core technologies which ultimately help manage the resources that will reduce the cost of IT operations, deliver an agile portfolio, and support new digital business initiatives.

Bitscape Azure Cloud Assessment Service

Cloud Assessment is important, as with any business transformation, to protect your organization's sensitive data. Azure enables you to manage user identities and credentials, and control access to protect business and personal information.

Bitscape Azure Migration Managed Service

The Strategic implementation by Bitscape and Modernization Solution from Microsoft Services provides a comprehensive approach to move applications, data and infrastructure to an enterprise-ready cloud.

Customer success: 4th Largest Bank in Midwest of US drives Digitization by migrating mortgage related services and infrastructure to Microsoft Azure

---

• "Our mortgage application is now not only internally consumed but leased to 40 other banks in West Coast, thanks to Bitscape solution and amazing 24/7 premium support."

•   - Vice President IT — The Bank
